EDUCATION

B.E. in Computer Science and Engineering

Chitkara University

2018-2022

- Gained knowledge from online platforms like Coursera and upGrad.
- Graduated with the score of 8.65 CGPA

PERSONAL PROJECTS

MERN Stack Developer, [Howdy](#)

- It is a web chat app, designed to chat with strangers and make it private for each user (*University Project*)
 - This was a team project involving five members, and my initial role was handling the backend part.
 - We used packages like socket.io for real-time chatting, bcrypt for password encryption, and JWT to avoid requiring users to re-enter their credentials each time they visit the website.
 - In the frontend part, I managed the website redesign and handled the deployment on Heroku. However, due to certain reasons, it is not currently in a deployed state.

AIO Lists, [link](#)

- Developed a Vite-React web application for managing shopping and todo lists, featuring dynamic state management and list export functionality. Utilized React hooks for state management and ensured a responsive UI.

Space Shooting, [link](#)

- Developed a space-shooting game where the player remains centered, shooting enemies that are attracted to their position. Utilized collision detection, physics-based movement, and responsive controls for an engaging gameplay experience.

PROFILE

I am an aspiring Full Stack Developer with a growing proficiency in the MERN (MongoDB, Express.js, React, Node.js) stack. My passion lies in web development, with a particular enthusiasm for front-end technologies, while I am also keen to expand my skills in back-end development.

WORK EXPERIENCE

Srijan- A Material+ Company

2022-Present

Full Stack Drupal Developer - Internship

Jan 2023 - Jul 2023

- During my internship, I received introductory training in Drupal as a full-stack developer.
- We were tasked to create a dummy website to add the review on the book by users and add functionalities like sorting, add favorites and language specific.

Full Stack Drupal Developer - Japan Client

Aug 2023 - Jan 2024

- It is a multinational company that manufactures oral health materials and related devices and equipment. During my tenure, I held various roles and took on different responsibilities as my career progressed.
 - It started with arranging data for syncing, creating sheets and documents for the team and testing the website to understand more about it.
 - In my backend role, I resolved website issues using tools like SonarQube, customized functionalities, managed taxonomy, configured content types, views, and modules, and adjusted site settings.
 - In my frontend role, I created and tested components using Storybook to ensure seamless integration into the main website.

Associate - US Clients

Feb, 2023 - present

- Detail-oriented professional trained as a Survey Engineer and currently serving as an Associate.
- Proficient in survey scripting and data analysis, with a strong ability to enhance survey design and functionality. Adept at managing projects and collaborating with cross-functional teams to support strategic business objectives..
